

PRODUCT DATA SHEET

Product Name: **WSU 150**

WSU 150 is a liquid poly/orthophosphate specially blended for use in potable water systems. The product is designed to minimize corrosion, scale and “red water” conditions.

WSU 150 has a negligible reversion rate even after being stored for long periods of time.

Color: clear liquid
Specific Gravity: 1.41
pH: 6.3
Viscosity: 45 cps
Freeze Point: -19C
Maximum Use Level: 32 mg/L

Treatment levels for **WSU 150** depend on the pH, calcium hardness and total solids of the water. The normal use rate of **WSU 150** is between 4 and 40 pounds per million pounds of water to be treated.

WSU 150 is supplied in bulk or in 15 and 30 gallon bung type non-returnable poly drums.

WSU 150 prices are FOB, Franklin, Indiana.
