

## PRODUCT DATA SHEET

Product Name: **WSU HYPO-CLEAN**

**WSU HYPO-CLEAN** is a liquid inhibitor designed to prevent the clogging of BLEACH (sodium hypochlorite) injection lines. The product is NSF approved and is designed for high hardness waters (200-400 mg/L). WSU HYPO-CLEAN will also prevent calcium hypochlorite clogging.

**WSU HYPO-CLEAN** has a negligible reversion rate even after being stored for long periods of time.

Color: clear liquid

Specific Gravity: 1.38

pH: 5.6

Viscosity (in solution): 45 cps

Freeze Point (in solution): +10F

Maximum Use Level: 29 mg/L

Treatment levels for **WSU HYPO-CLEAN** depend on the pH, calcium hardness and total solids of the water. The normal use rate of **WSU HYPO-CLEAN** is 4 oz. (1/2 cup) mixed with each 10 gallons of hypochlorite solution.

**WSU HYPO-CLEAN** is supplied in 15 and 30 gallon bung type non-returnable poly drums, and 4-1 gallon containers.

**WSU HYPO-CLEAN** prices are FOB, Franklin, Indiana.
