

## PRODUCT DATA SHEET

Product Name: **WSU 175**

**WSU 175** is a liquid poly/orthophosphate specially blended for use in potable water systems. The product is designed to minimize corrosion, scale and “red water” conditions.

**WSU 175** has a negligible reversion rate even after being stored for long periods of time.

Color: clear liquid  
Specific Gravity: 1.41  
pH: 6.3  
Viscosity: 45 cps  
Freeze Point: -19C  
Maximum Use Level: 32 mg/L

Treatment levels for **WSU 175** depend on the pH, calcium hardness and total solids of the water. The normal use rate of **WSU 175** is between 4 and 40 pounds per million pounds of water to be treated.

**WSU 175** is supplied in bulk or in 15 and 30 gallon bung type non-returnable poly drums.

**WSU 175** prices are FOB, Franklin, Indiana.
