

PRODUCT DATA SHEET

Product Name: WSU AMMONIA

WSU AMMONIA is a liquid ammonia product for use in potable water systems, and designed to add ammonia for chloramination.

WSU AMMONIA has a negligible reversion rate even after being stored for long periods of time.

Color: brown liquid
Specific Gravity: 1.22
pH (25% solution): 5.3
Viscosity (in solution): 45 cps
Freeze Point (in solution): 18F
Maximum Use Level: 10 mg/L

Treatment levels for WSU AMMONIA depend on the pH, calcium hardness and total solids of the water. The normal use rate of WSU AMMONIA is between .1 and 1.0 pounds per million pounds of water to be treated.

WSU AMMONIA is supplied in bulk or in 30 gallon bung type non-returnable poly drums.

WSU AMMONIA prices are FOB, Franklin, Indiana.
