

PRODUCT DATA SHEET

Product Name: **WSU 120**

WSU 120 is a liquid poly/orthophosphate specially blended for use in potable water systems. The product is designed to minimize corrosion, scale and "red water" conditions.

WSU 120 has a negligible reversion rate even after being stored for long periods of time.

Color: clear liquid
Specific Gravity: 1.53
pH: 10.2
Viscosity: 45 cps
Freeze Point: 0C
Maximum Use Level: 32 mg/L

Treatment levels for **WSU 120** depend on the pH, calcium hardness and total solids of the water. The normal use rate of **WSU 120** is between 4 and 40 pounds per million pounds of water to be treated.

WSU 120 is supplied in bulk or in 15 and 30 gallon bung type non-returnable poly drums.

WSU 120 prices are FOB, Franklin, Indiana.
